

Jedox Mobile

With Jedox Mobile we present reporting and analysis on mobile devices such as the iPad, the iPhone or Android based mobile phones and tablets.

Larger screens on smart phones and tablets allow Business Intelligence applications to be used anywhere. Touch screen technology provides simple navigation through information that including the creation of reports and analysis.

Pure Mobility

Jedox Mobile brings your Reports and Analysis in an enhanced and optimized view in a new format.

Easy to iPad & iPhone

Access to Jedox Mobile is simple. After downloading the 'Jedox-Mobile App', users connect to the Jedox server and have access to the same Jedox cube and previous reports as usual. Server based, all that needs to be done is to have the Jedox Mobile Connector installed. The Role and Access-rights are obtained from other Jedox environments and remain the same.

Jedox Mobile for the iPhone

Jedox Mobile Lite allows you to display and play with corporate data in a variety of graphical or numerical views. Reports can be saved and individually changed to your needs on your Smartphone to give you full control over your corporate data on the road!
